

## 13772396 STEM DIY Catapult Craft Kit

The following item is considered a STEM craft. The instructions for this item are extremely simplified, as there is no right/wrong way to put this item together. The purpose of this product is to learn through the process of experimentation, and trial and error.

### Instructions:

1. Stack 6 craft sticks and tie a rubber band tightly around one end.
2. Tie another rubber band tightly around the opposite end so all 6 sticks are bound together.
3. Take the remaining 2 sticks and tie a rubber band on one of the ends. Try to tie the band close to the edge of the sticks.
4. Insert the 6 sticks banded together through the 2-stick bundle as shown in the illustration below.
5. Tie a rubber band in a cross fashion joining the two pieces. The closer the 6-stick bundle gets to the edge, the more leverage the catapult will have.
6. Use the double-sided foam to adhere the plastic egg bottom to the end of the catapult as shown below.
