

Paint Your Own Porcelain

1 Prepare Your Work Area

1. Use disposable paper to protect your work surface.
2. Paint may stain. Protect your clothing before opening the paint.

2 Prepare Your Porcelain, Paints and Ribbon

1. Wash all porcelain pieces with soap and water. Let each piece dry thoroughly.
2. Stir each paint pot to mix the paint prior to use. If the paint appears to be too thick, add a few drops of water and mix thoroughly.
3. Carefully trim ribbon to your desired length.

3 Plan Your Design

Use a pale marker (light yellow or green works well) to sketch a design on each porcelain piece.

4 Paint Your Porcelain

Express your creativity—check out the color mixing and paint application techniques on the back!

Helpful Tips

To prevent the paints from drying out, open only one color at a time.

Clean your brush in water prior to dipping the brush in another paint color.

Wait until the first coat of paint is dry to the touch before applying a second coat or another color.

5 Baking Instructions

IMPORTANT

ADULT SUPERVISION IS RECOMMENDED. USE A CONVENTIONAL GAS OR ELECTRIC OVEN. DO NOT USE A MICROWAVE.

Do not use a microwave oven to bake the porcelain.

Do not touch the porcelain right after baking.

The porcelain is EXTREMELY HOT.

Painted and baked porcelain should not be washed as it may cause your painted design to flake off. To clean, dust with a dry cloth.

1. To achieve the best results and brightest paint colors, allow the painted porcelain 24 hours drying time.
2. Preheat the oven to 225°F / 110°C.
3. Set the painted porcelain on a baking sheet and carefully place it in the oven.
4. Bake the porcelain in the oven for 30 minutes.
5. After 30 minutes, turn the oven off. The porcelain will be very hot. Let the porcelain cool in the oven prior to removal.
6. Although baking your painted design will strengthen the finish, it is not permanent. Washing your final creation may damage the design.
