

13811868 Snakes and Ladders Large Game

For 2 to 4 players

Win the game by being the first player to reach the “winner” square!

To begin: Each player chooses a game piece and rolls the dice. The player who rolls the highest number goes first. Each player begins the game at square one.

During a turn: A player rolls the dice and moves their game piece the corresponding number of squares, following the sequence of numbers on the game board. For instance, if a player rolls a three, they would move their game piece to square #3 on the game board. After they move their game piece, their turn is over and the next player’s turn begins.

If a player ends their move on a ladder/picture illustration: they may instantly move their game piece up to the top of the ladder.

If a player ends their move on a snake head/picture illustration: they must instantly slide their game piece down the snake to the square at the end of the snake’s tail.

To win: Land on square #100 exactly! If a roll would move a player’s game piece past square #100, they must try again on their next turn.
