13831937 BUILD-A-BOARD - ROOT WORD LESSON RESOURCE GUIDE

Example of assembled bulletin board:

Create a bulletin board with your students' work!

Assess your students' knowledge and display their work with this Root Word Build-a-Board activity. Hand out a tree to each student. Then, either provide a root to each student or have them pick their own. Next, fill in the tree with words that contain their root. You can also have students include the meaning of the root. Once all the students have filled out a tree, hang them up on a bulletin board for all to see.
