

13943732 Pullback Rocket

Instructions:

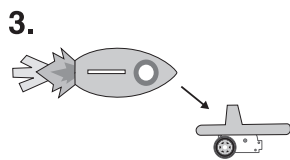

Using the picture as a guide, adhere the pieces together as shown.

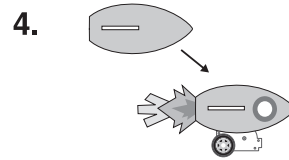

1. Sandwich the pullback base between the adhesive foam pieces with the longer side towards the back, ensuring the mechanism isn't covered and the wheels turn smoothly.

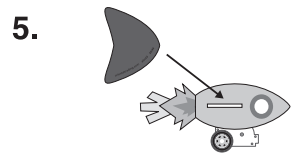

2. Sandwich the yellow blast foam piece in between the two orange flame foam pieces, and stick the assembled piece on the back side of one rocket foam piece. Ensure the cutout slit does not get covered.

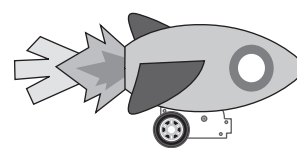

3. Place your assembled piece on the outside of the base.

4. Sandwich together the remaining rocket foam piece on the opposite side.

5. Insert the rocket wing foam piece through the center cutout of the rocket.
