

13962595 Long Stem Rose Craft Kit

Instructions:

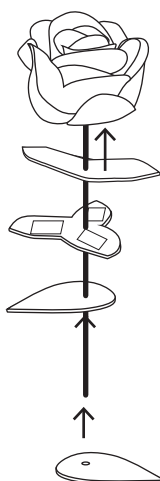

1. Using the double-sided adhesive foam, attach the stick to the outer end of the foam petal piece in the position shown below. Wrap the petals around the stick to create the flower. Add two more adhesive foam pieces while wrapping, or more if needed. (Save three for later.) Once fully wrapped, add another adhesive foam piece on the end to secure the flower together.
2. Thread on the adhesive-backed two-leaf foam piece (sticky side toward the flower) and adhere it to the bottom of the flower, using the leaves to help secure the flower shape if needed. Thread on the three-leaf foam piece and adhere it to the flower with the adhesive foam strips, if desired. Thread on the two remaining leaves.
3. Tie the card onto the flower stem using the jute string.

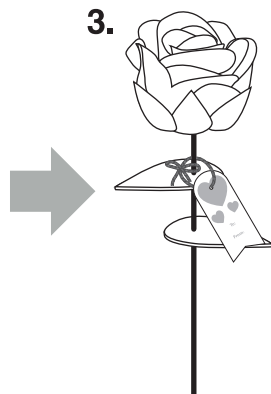

- 1.** Position the stick and double-sided adhesive foam exactly as shown on shape.
