

13962614 Fingerprint Heart Ornament Craft Kit

Please be sure to have adult supervision for this craft.

1. In a disposable mixing container (not included) add 1/2 of the bag of plaster. Measure 1 teaspoon of water, add to the plaster and stir until blended, about 20 seconds.
2. Add remaining plaster and stir for an additional 30 seconds to remove all lumps. If the plaster is too thick, add a few drops of water. You should have the consistency of pancake batter.
3. Pour plaster mix into the plastic mold. Mixture should fill the mold about half way to the top. Gently tap bottom of the mold on table to remove any bubbles.
4. Let plaster set up for about 5 minutes (depending on humidity).
5. To make the hole for hanging the ornament, use the included wood dowel. Insert it into the top of the ornament 1/4" from the edge of the mold. Keep dowel in the plaster to remove in the next step.
6. Let the mold set for about one hour or until plaster is hardened. Remove dowel by slowly twisting and pulling up. Remove ornament from the plastic mold. Turn ornament over to place the smooth, clean side up. Let it dry overnight. It is recommended to place the ornament on a cooling rack (not included) so air can circulate around the entire ornament as it dries.
7. Once the ornament is dry, use the included ink pad to make the design on the ornament. Press pad of child's finger onto ink sponge and then press on to ornament in the shape of heart as shown in photo.
8. After print is made, make sure to wash child's hand.
9. To finish, insert cord through the hole, and tie it for hanging.
