

14105275 Silly Acetate Campfire Craft Kit

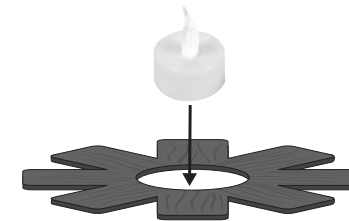

1. To make the tissue paper glaze, mix white glue (not included) with a small amount of water until the glue is a thin liquid.
2. Use a paintbrush (not included) to apply the glaze to one side of the clear acetate sheet. (Do this in small 2 inch x 2 inch areas at a time so that the glue doesn't dry before you can apply all the tissue squares.) Leave the area below the dotted line and the area on the side with the printed rectangle free of glue. Place the eraser end of a pencil (not included) onto the center of a tissue paper square. Wrap the tissue around the pencil and press the tissue onto the acetate sheet.

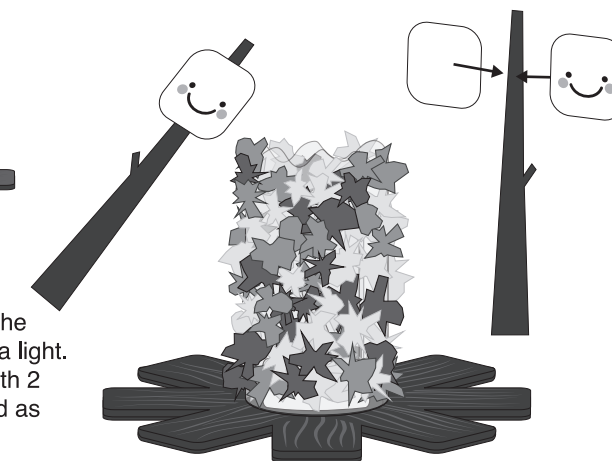

3. Adhere the double-sided adhesive strip to the printed rectangle on the acetate sheet. Then roll the sheet into a cylinder and adhere the strip to the back of the other end of the sheet to make the "fire". Make sure that the cylinder fits into the hole on the campfire logs before securing with the adhesive strip.

4. Place the battery-operated tea light in the center of the campfire log piece.

5. Place the "fire" cylinder in the middle circle area over the tea light. Sandwich each stick piece with 2 marshmallow faces at the end as shown.
