

14194095 DIY WOOD DREAM CATCHER CRAFT KIT

Instructions:

1. Paint or color the wood pieces as desired.
2. After pieces have dried, tie the string to the hoop. Using the diagram below, thread the string around the hoop to make your desired pattern. Make sure you add the wooden beads and wooden decorations as you go. Once you are done, tie the string in a knot and trim away the extra string. Use glue (not included) to help hold the bird and beads in place if desired.
3. When the web is finished, use the jute cording to attach the wood feathers to the bottom of the dream catcher. Attach the final piece of of the cording to the top of the hoop to make the hanger.
