

# 14194211 Wrapped Wings Butterfly Craft Kit

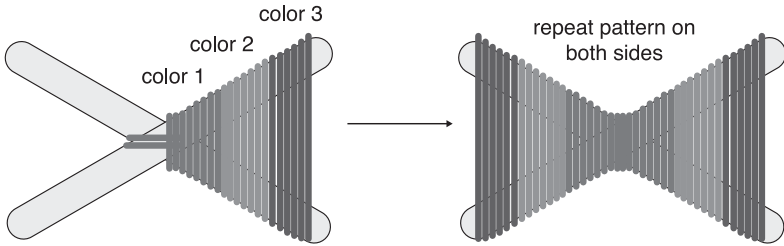

## Instructions:

Using the picture as a guide, assemble the craft as shown.

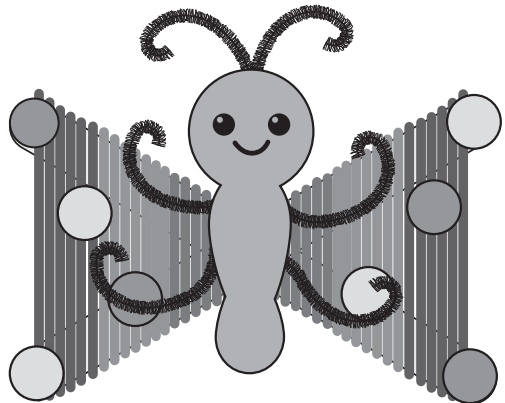

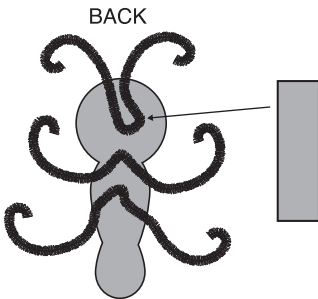

1. Use one white double-sided adhesive foam square to adhere the craft sticks together in the center. Then, use the short piece of cording to tie the sticks together as shown, and secure with a knot on the back side.

2. Start in the center, and wrap the long cording outward toward each side to create the butterfly wings. Tip: leave a tail at the beginning of the cording when you begin wrapping, and when you have completed wrapping a color section, tie the ends of the cording together on the back side. Trim any excess cording after you have completed wrapping the entire craft.

3. Bend the chenille stems and adhere them to the back of the butterfly with the adhesive foam rectangle.
4. Use the double-sided adhesive foam square to attach the body to the front of the wings. Adhere the foam circles to the wings to complete the craft.
