

14268634 Monster Math Measurement Game

Showing equal numbers:

Have students work independently or in small groups to represent different ways to show a number.

- They place one number (or set of numbers) on one side of the monster.
- Then place numbers on the other side of the monster that equal the other side. For example: place 5 on the left side of the monster and then 2 and 3 on the other side.

Show greater than or less than equations:

Students work independently or with a partner to show greater than or less than equations.

- Have students place numbers or sets of numbers on both sides of the monster.
- Place the correct sign in the monster's mouth to show which number is larger and which is smaller.
