

14324420 TASSEL TREE WITH WOOD BEAD ORNAMENT CRAFT KIT

Instructions:

1. Start by cutting the cording. You will need one piece 14 inches long and twenty smaller pieces 8 inches long.
2. Fold the 14 inch piece of cording in half with the loop at the top. Insert the loop through the wooden bead and pull the loop through so it is about 1 inch long. Lay flat on table.
3. Start creating your branches by folding one piece of smaller cording in half and lay it under the center piece with the loop on the left.
4. Fold another piece of cord in half and lay it over the center piece with the loop on the right. Pull the ends of each piece through the loop from the opposite piece and pull tight to create your first knot.
5. Make your second branch by tying the same knot, but this time putting the bottom loop to the right and top loop to the left.
6. Repeat the knots with the remaining pieces of cord, alternating the sides of the loops with each branch.
7. When you are finished tying all the knots, trim into a tree shape.
8. (optional): Use a toothpick or the end of a paper clip to fray the branch pieces.

1. CUT
