

14325735 Christmas Stencils

Instructions:

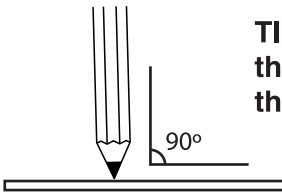

1. Punch out the middle gear section of the stencil. Use scissors (not included) to remove the tabs from the sides of the small gear stencil.

2. Place the small gear stencil back into the middle section of the large stencil. Put the pencil tip into a hole on the small gear.

3. Position the pencil into the stencil at a 90 degree angle. Use pencil to draw in the circle. Remove the stencil and check out your artwork!

TIP! Try flipping the stencils over with the flat sides facing upward to help the inner gear rotate easily.
