

14356042 STEM Flying Helicopter Craft Kit

Assembly Instructions:

1. Decorate the helicopter with markers, crayons or pencils.
2. Fit the propeller and the hook onto the ends of the wood stick.
3. Use the double-sided adhesive foam to attach the helicopter shape to the wood stick.
4. Attach the rubber band onto the propeller hook and the hook.
5. Twist the propeller to wind the rubber band. The tighter you twist the rubber band, the higher it will fly. Keep hold of the propeller until ready to watch the helicopter fly!
