

14384065 DIY Wood Pig with Windmill Wings Craft Kit

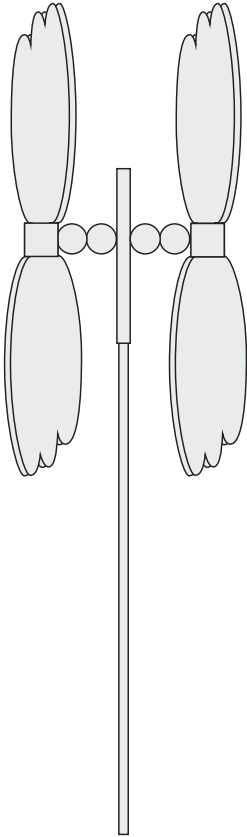

Instructions:

Paint or decorate the pieces as desired.

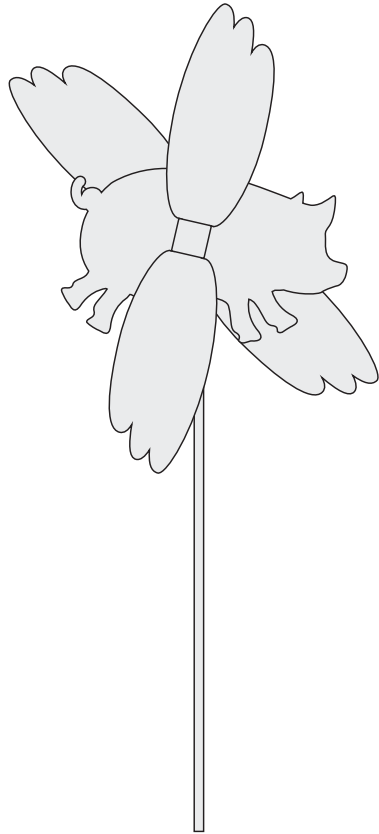

1. Insert the long dowel into the hole on the bottom of the pig.
2. To create the wings: Insert the short dowel through the hole in the center of the pig's body, then thread two beads onto one side of the dowel. Place one "capper" cube on the end of the dowel to hold the beads in place. Repeat for the opposite side. Insert the wings into the slots on the wooden cube as shown.

If desired, use wood glue (not included) to reinforce.
