COMPONENTS LIST

QTY. 2	A) Lower Post
QTY. 2	B) Upper Post
QTY. 1	C) Middle Left
QTY. 1	D) Middle Right
QTY. 1	E) Middle
QTY. 4	F) Post Peg
QTY. 6	G) Post Support
QTY. 1	H) Sign
QTY. 6	I) Horseshoe
QTY. 6	J) Star
QTY. 1	K) Rope
QTY. 1	L) Tape

HELPFUL REMINDERS

- Check that all materials are included in your kit.
- Please read through the instructions before you begin assembly.
- Make sure that your work area is spacious enough to assemble the arch.
- Assembly time should be about 20 minutes for two people.

STEP 1:

Fold each Lower Post (A) along the score lines to form a long box shape with the printed side facing out. Fasten the box shape securely by inserting the large and small tabs into the slot openings.

Repeat Step 1 to make a total of two Lower Posts (A).

STEP 2:

Pop out the four tabs found at the bottom of each side of the Lower Posts (A)

Repeat Step 2 on each of the Lower Posts (A).

STEP 3:

Fold the three Post Supports (G) along the score lines to form a triangular box shape and then insert them into the four slot openings at the base of the Lower Post (A). Make sure to leave the tab on the Lower Post (A) up and out in the open

Repeat Step 3 on each of the Lower Posts.

Important

- Leave one of the sides with the two holes at the top without a Post Support (G)!

Leave one side with holes on top without a support on bottom

STEP 4:

Fold the tab found on the Lower Post (A) into the open slot found at the top of the Post Supports (G). This will lock the supports into place making the post more sturdy.

STEP 5:

Fold each Upper Post (B) along the score lines to form a long box shape with the printed side facing out. Fasten the box shape securely by inserting the large and small tabs into the slot openings.

Fasten the top of the post by inserting the top tab into the slot opening.

Repeat Step 5 to make a total of two Upper Posts (B).

STEP 6:

Fold each Post Peg (F) along the score lines to form a long box shape with the printed side facing out. Fasten the box shape securely by inserting the large and small tab into the slot openings.

Fasten the top and bottom of the post by inserting the top tab into the slot opening.

Repeat Step 6 to make a total of four Post Pegs.

STEP 7:

Fold Middle Left (C) and Middle Right (D) along the score lines to form a long box shape with the printed side facing out. Fasten the wood shape securely by inserting the large and small tabs into the slot openings.

Fasten the top of the shape by inserting the top tab into the slot opening.

Repeat Step 7 to make a total of two Middle end pieces.

STEP 8:

Fold Middle (E) along the score lines to form a long box shape with the printed side facing out. Fasten the wood shape securely by inserting the large and small tabs into the slot openings.

HELPFUL HINT

- Sometimes it helps to start with the tabs in the middle.

STEP 9:

Place one of the Upper Posts (B) into the top opening of the Lower Post (A) making sure that the two open holes found on each line up.

Repeat step 8 to make a total of two tall posts.

The holes found on the bottom of (B) and the top of (A) should line up when the two pieces are joined.

STEP 10:

Place two of the Post Pegs (F) into the two openings found in the middle of the combined tall post. The Post Pegs (F) should go all the way through to the other side leaving a little of each peg sticking out of the newly created tall Post.

STEP 11:

Popping the tabs out at the end of the Post Pegs (F) will give you stronger support of the fence.

STEP 12:

Place the Middle Left (C) and Middle Right (D) at the ends of the Middle (E) piece so the side tabs line up as shown below. Once the side tabs are lined up, push the tabs in and lock them into place.

HELPFUL HINT

- The Middle (E) has two locking tabs at each side. You will only need one set at each end for the locking tabs. Two are provided so you can make the arch opening wider or thinner depending on where you place it. Use the inner tabs for a more narrow entrance. Use the outer tabs for a wider entrance.

STEP 13:

Place the two tall constructed posts several feet from each other. The sides of the posts without the Post Supports (G) should be facing inwards. Then place the constructed middle piece in through the holes found at the top of each tall post.

Repeat step 11 on the outside of the middle piece to strengthen the arch.

HELPFUL HINT

- This step will need the use of two or more people to complete.

STEP 14:

Personalize the Sign (H) with markers, paint, or any other material to make the arch unique to your event. Once complete tape the sign to the constructed middle piece of the sign with the double sided Tape (L).

Decorate the rest of the Arch with the Horse Shoes (I), Rope (K), and Stars (J) with the double sided Tape (L).

HELPFUL HINT

- It's good to use two strips of double sided tape across the whole backside of the sign.
