

57/6109 DYO Kaleidoscopes Craft Kit

1. Color or decorate the white cardstock piece any way you like. Fold the silver reflective surface piece as shown below. Use the small adhesive stickers to hold the two edges of the reflective surface shut.
2. Fold the white cardstock piece into a tube shape. Insert the tabs on one edge of cardstock into the slots on the other edge of the cardstock. You may tape or glue (not included) to better secure the tube shut. Insert the reflective surface piece into the tube.
3. Place the plastic beads into the deep plastic end cap. Place the clear plastic disk into the deep end cap to secure the beads and snap it tightly in place. Use glue (not included) to secure the plastic end caps to either end of the tube.
4. To view the effect, rotate the entire kaleidoscope tube.
